Eartha Kitt was once referred to as "the most exciting woman in the world" by Orson Welles. From her vast singing and acting career and for being outspoken in the world of politics and publicly ostracized for her anti-war remarks that derailed her career, Kitt's life was definitely one of intrigue. Now she's being immortalized via a comic book. "Eartha Kitt: Femme Fatale", written by New York Times Bestselling Author Marc Shapiro, who also penned the Julie Newmar series, was released last week. "This series has been have been so much fun to do," said Shapiro. "And it is an homage to the kinds of stories that first appeared in the mid-60's".

According to the press release: Eartha Kitt is on holiday, searching for the purrfect wave. When suddenly??? Well we won't spoil the surprise. But in the tradition of DC Nation and all good things for all ages comes Eartha Meets The Gorgon, the first in a series of adventures. Eartha Meets The Gorgon is the long anticipated return to good clean fun.
